Kipptisch und Task Force Monitor

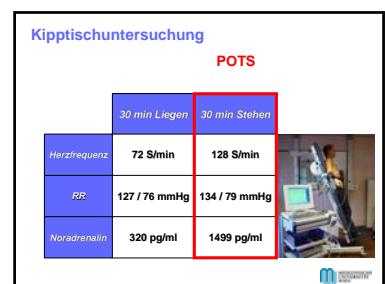

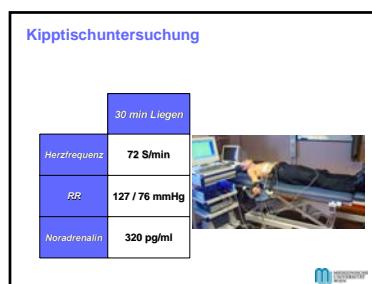

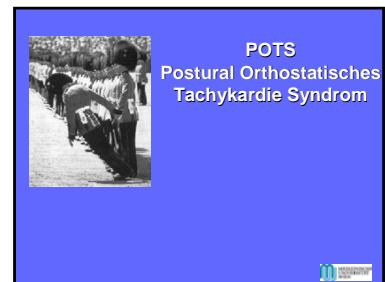

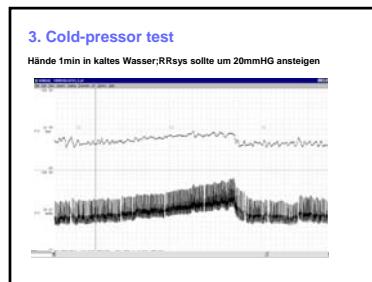

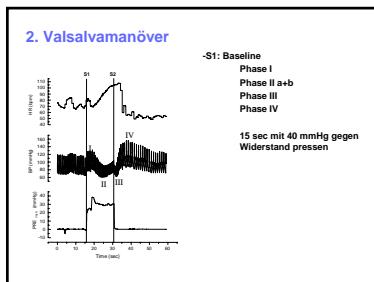

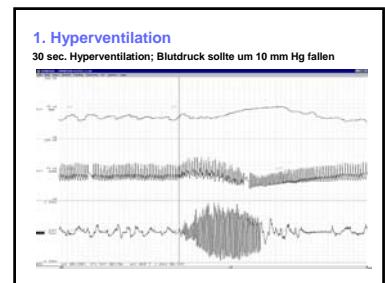

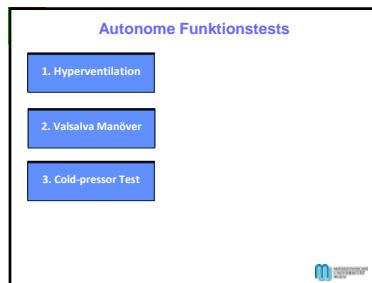

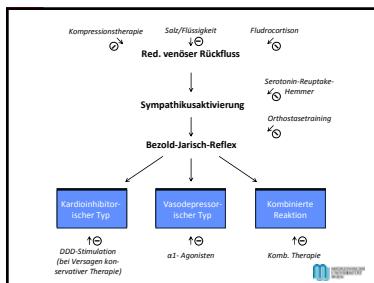

Tilt Table Test
or
Head Up Tilt (HUT)

Synkopen Klassifikation				
data pooled from 4 population-based studies (total 1640 patients)				
Reflex-synkopen	Orthostatisch	Rhythmogene Synkope	Strukturelle kardiovaskuläre Erkrankungen	Synkope bei zerebrovask. Erkrankung
1 • Neurologisch • Karotissinus- • Situationsbedingt • Husten • Miktion • Erbrechen • Niesen • andere	2 • Autonome Dysr. • primär • sekundär • Orogen, Med. • Orthostatische Dysregulation • POTS • O.-Hypotonie	3 • Bradykardie • AV block • Tachykardie • VT • SVT • angeboren	4 • AMI • Herzinfarkt • HOCM • Pulmonal • Hypertension/ Lungenembolie • andere	5 • Steal Syndrome • Gangrän- obstruktion • anderer Ursachen: • Alzheimers • Metabol. Störung • Intoxikation
Unbekannte Ursache = 11%				

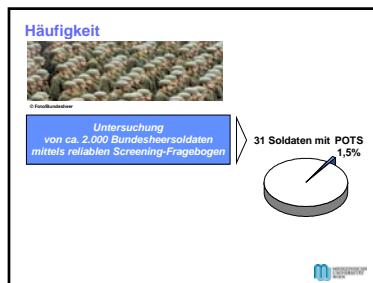

Entwicklung einer Screening-Methode: Fragebogen

Übelkeit:	2
Zittern der Hände:	0
Schwindel:	3
Herzklopfen:	—
Kopfschmerzen:	—
Schweißausbrüche:	—
Verschwommenes Sehen:	—
Beklemmungsgefühl:	—
Gefühl der Leere im Kopf:	—
Konzentrationsschwierigkeiten:	—

0: niemals
1: 1x im Monat
2: 2-4x im Monat
3: 2-7x die Woche
4: öfter als 1x täglich

Diagnostic management of OI in the workplace.
(2003) Int Arch Occup Environ Health 76:143-50.

Ätiologie

- 1) Noradrenalin-Transporter
- 2) Adrenorezeptoren
- 3) Endotheliale NO-Synthase
- 4) Endothelin-1 Gen
